📄 Summary

I am a developer mainly experienced with front-end web development, though I am not against doing full-stack or back-end work. I have 2 years of work experience. In my professional life I have familiarized myself with React, TypeScript and Redux. I'm always open to new learning experiences and looking forward to getting the most out of what coding has to offer.

📁 Professional Experience

Front-End Developer 11/2024 – 10/2026 | Brussels
Apptweak 🔗

I worked as a **Front-End developer** in the "Design System" squad. We would maintain a library of **custom components**, think Base UI but every component was tailored to our own design vision. Here I did a lot of work with **React, TypeScript and Redux**. We worked in **Sprints** of 1 or 2 weeks depending on the incoming workload.

Full-Stack Developer 02/2024 – 04/2024 | Leuven
Adshot 🔗

Internship. Here I worked with **Vue.js and Knex.js**. It was a great starting experience to get to know the work life. We did a daily **stand-up meeting** where we would share our progress and ideas.

🎓 Education

Bachelor of Applied Computer Science (Computer Software Engineering) 02/2020 – 06/2024 | Leuven
UC Leuven-Limburg 🔗

I learned to work with several languages and tools during my education here. The ones that stayed with me the most were **JavaScript, TypeScript, React, Agile** and **Java**. Some cybersecurity and business was also part of the classes but my main interest was in software development.

📁 Projects

Portfolio 🔗

A portfolio created with **React, TypeScript** and **CSS**.

Releastiary 🔗

Video game release date calendar created with **React, TypeScript, Tailwind, shadcn, Express**
